

IDC4251C Module 3 Project

This is the project for Module 3. There is no Canvas submission, all submissions will be made to your GitHub Classroom repository after accepting the invitation.

This project follows Chapter 3 of the Microsoft Power BI video course.

All data files for this project can be found in the GitHub Classroom repository.

In the project you will start with your blank template workbook from Module 2.

In the blank workbook complete the tasks as specified in the chapter videos. Take a screen snip of the final Data View from your workbook for the aggregated "population-2010-2040" query in the "Other Queries" group (your image should also show the names of the queries in new "Source" query group).

Save your work book as "query-editor-basics".

Commit your screen snip workbook to the repo.
